# Recommendations:

The 5<sup>th</sup> annual meeting , centers on the main theme of " challenges and opportunities of emerging technologies " brought together research, practitioners, policymakers , and stakeholders to explore the transformative potential and inherent complexities of the rapidly evolving technological landscape. Based on the insightful discussions and presentations, the following recommendations are proposed to guide future actions.

1. supporting  cooperation with the WGITA working group in various fields, such as:
   o Research and innovation.
   o Cybersecurity.
   o Training and education programs.
2. Establishing  a dedicated subgroups tasked with designing and conducting comprehensive surveys , as well as analyzing the resulting data , the initiative aims to identify and prioritize the overarching needs and challenges  faced by INTOSAI  Community
3. Updating the database of experts with the possibility of cooperation with academies and institutions with expertise in emerging technology, and under responsibility of related regulatory SAI.
4. Establishing    an editorial board to manage the group's magazine, in addition to developing special procedural rules to organize the publishing process. An email will be sent to seek the opinion of the supreme audit institutions on this matter.
5. Encouraging  members to visit the working group's page on the INTOSAI community portal, where all events, documents, and meeting minutes will be uploaded.

These recommendations provide a framework for WGISTA to contribute meaningfully to navigating the challenges and harnessing the opportunities presented by emerging technologies. The specific implementation of these recommendations will require further deliberation , resource, allocation, and collaborative efforts among WGISTA members and relevant stakeholders.
